

# DH 50 Vectorfogger

## Portable Spraying-Device

5-50 micron

The DH 50 Fogger was designed with toughness in mind.

With a very fine droplet size and a remarkable performance, the fogger is characterized as a very reliable sprayer. Thanks to the user-friendly design, the fogger is especially easy to use and fill. Furthermore, you can adjust the droplet size very easy at the front cap by rotating the cap left or right.

The Vector Fogg C150 - DH 50 Fogger is an already international successfully used device for spray-vaccination, disinfection and / or cleaning. Thanks to its enormous power it provides an up to 10 meter long spray range.

Depending on the needs and possibilities inside the hatchery / field the Fogger is available with wire or battery.

- Simple operation method of the machine
- Easy control of sprayed capacity by turning nozzle cap left and right
- Ultra Low Volume (ULV) droplet size between 5-50 micron
- Amount of injection: 0.2 ~ 1L / min
- Capacity of tank: 5L (max. 6L)
- Length of injection: Horizontal 5 ~ 10m
- Light-weight, portable
- Use of 220V (home-use), no place-limitation
- Spec. of medical nozzle 3.5 Ø
- Weight (dry) 5.0 kg
- Cord length: 10m
