

Knapsack

115-120 micron (standard)

The Knapsack Sprayer is our all-rounder. As opposed to many competing products, the Knapsack Sprayer provides some compelling advantages. Of particular note is the replaceable battery. This allows a nearly seamless use of the Knapsack as long as this is required (only by changing the battery). The standard version of the Knapsack sprayer comes with either one or two lances. In case you require a bigger spray radius, we offer telescopic lances. The device was specially build for spray vaccination and disinfection.

- With one or two lances
- Easy, comfortable use with 2 adjustable shoulder bands
- Low weight (5.2 kg dry)
- Closed housing → no pollution possible on the inside
- No build-up of fluid remains → no growth of bacteria
- Fluid tank ± 15 ltr
- Pressure 5 or 8 bar (selection switch)
- Capacity: ± 1.5 ltr/min
- Power supply by 12 V 5.0 Ah NiCd battery
- Rechargeable Battery
- Battery checker
- Continuous operation time 1 hr. (high pressure mode) or 2 hrs.
(low pressure mode)
- Recharging time 120 min. (per low pressure mode)
- Battery charger with overload prevention Lance with tandem nozzle
(Charging time: 2,5h)
- Nozzles with different droplet sizes available
- Length x Width x Height: 250 x 370 x 480
